## Canadian unemployment rate, population groups

Unemployment rate by population group, 3-month moving averages, unadjusted for seasonality, Canada, September 2020 to March 2021

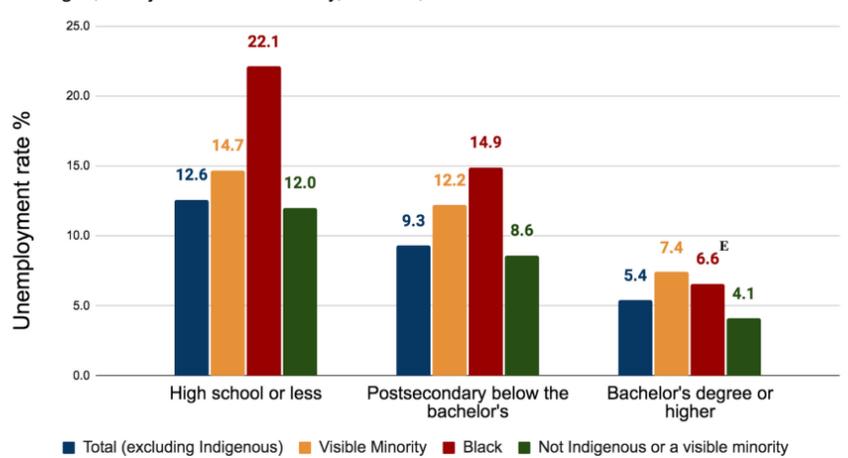

Across Canada, the unemployment rate has differed by visible minority group from Sept 2020 to Mar 2021. The **Black, South East Asian, Arab, and Latin American** communities have faced a relatively higher unemployment rate compared to other groups.

## Unemployment Rate and Education

Individuals in the Black community who have a high school diploma or less are **nearly twice as likely to be unemployed** compared to the Non-visible minority (or Indigenous community). Irregardless of level of education, Black and Visible Minority Canadians face higher rates of unemployment.

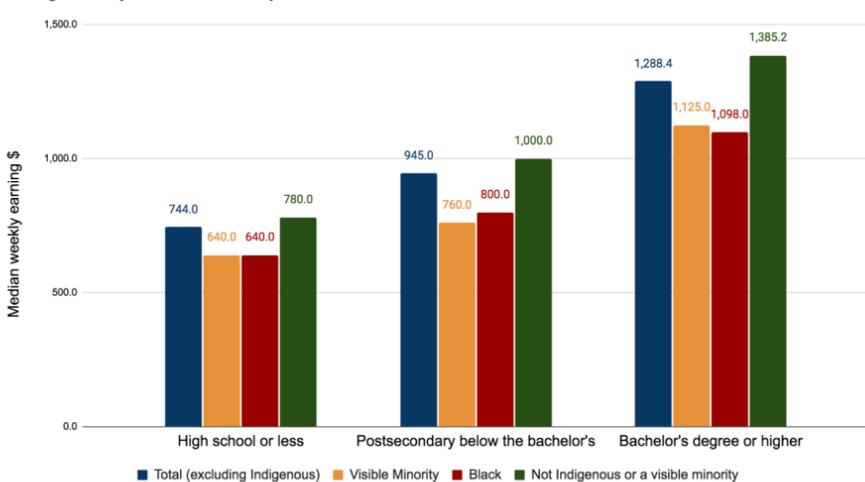

Unemployment rate by population group and educational attainment, 3-month moving averages, unadjusted for seasonality, Canada, March 2021

Notes: E: Use with caution; Coefficient of Variation greater than 16.5%

## Median weekly Earning + Education, March 2021

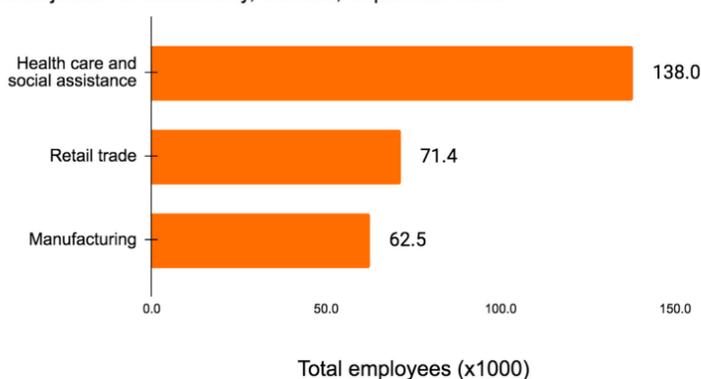

Median weekly earning of employed employees by population group and educational attainment, 3-month moving averages, unadjusted for seasonality, Canada, March 2021

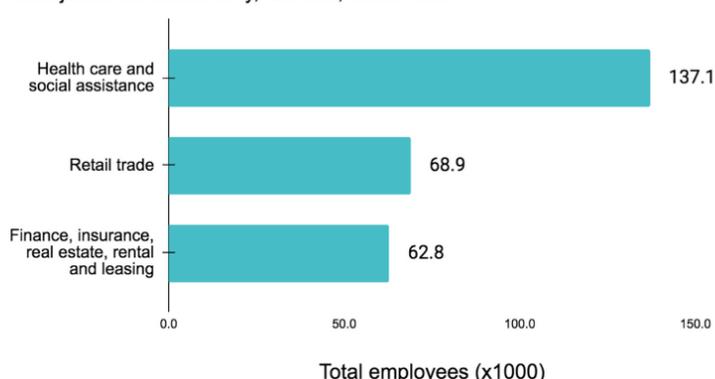

Irregardless of education level, Visible Minority & Black Canadians earn less of a median weekly income compared to the Non-visible minority (or indigenous) population group with the same level of education. **As education progresses, this income gap grows.**

# Which Industries do most Black community members work in?

Most popular industries for Black community, 3-month moving averages, unadjusted for seasonality, Canada, September 2020

Most popular industries for Black community, 3-month moving averages, unadjusted for seasonality, Canada, March 2021

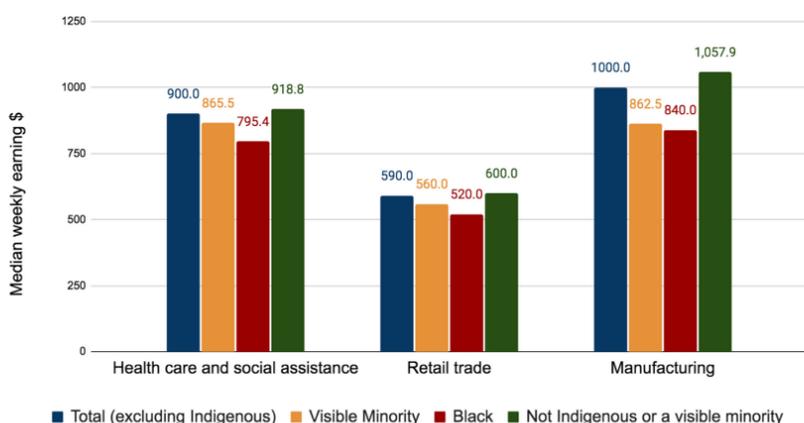

## Top 3 in 2020 vs Top 3 in 2021

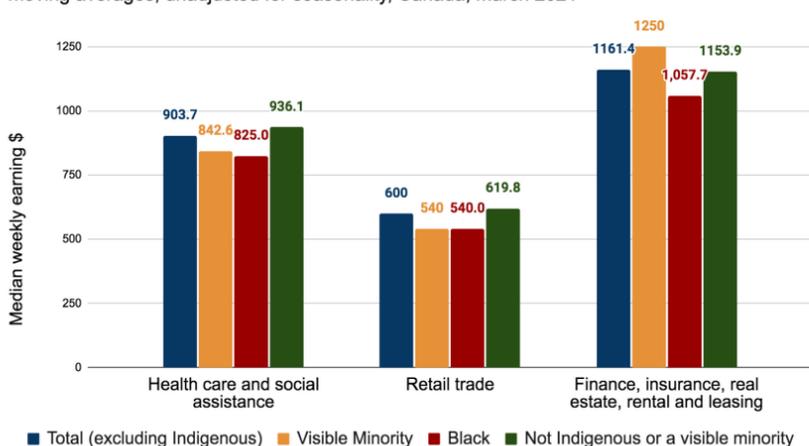

In September 2020, the Visible Minority and Black communities had lower median weekly earnings across the popular industries of employment, compared to the non-visible minority (or Indigenous) community

Median weekly earnings of employed employees by population group and industry, 3-month moving averages, unadjusted for seasonality, Canada, September 2020

Median weekly earnings of employed employees by population group and industry, 3-month moving averages, unadjusted for seasonality, Canada, March 2021

By March 2021, the Black community still had lower median weekly earnings compared to the non-visible minority (or Indigenous) community.

**29.1%**

## Black youth and young adults aged 15 to 24

who were in the labour force were unemployed during the first quarter of 2021. This is nearly double the unemployment rate of the non-visible minority (or Indigenous) population of the same age group (15-24).

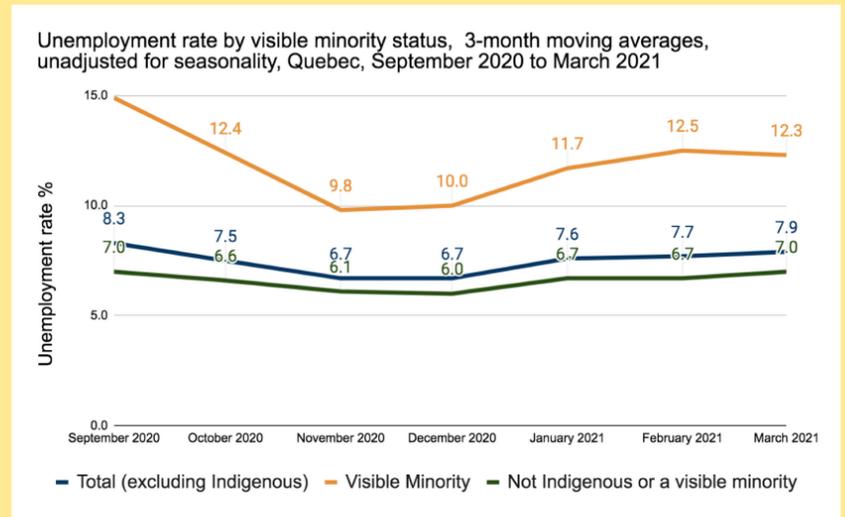

# Black in Quebec

The project team recently received data from Statistics Canada. The data is sourced from the monthly Labour Force Survey and this Infographic is part 2 of a 2-part series. Part 2 focuses on Visible Minority Quebecers as part of a provincial theme. The data is from September 2020 to March 2021.

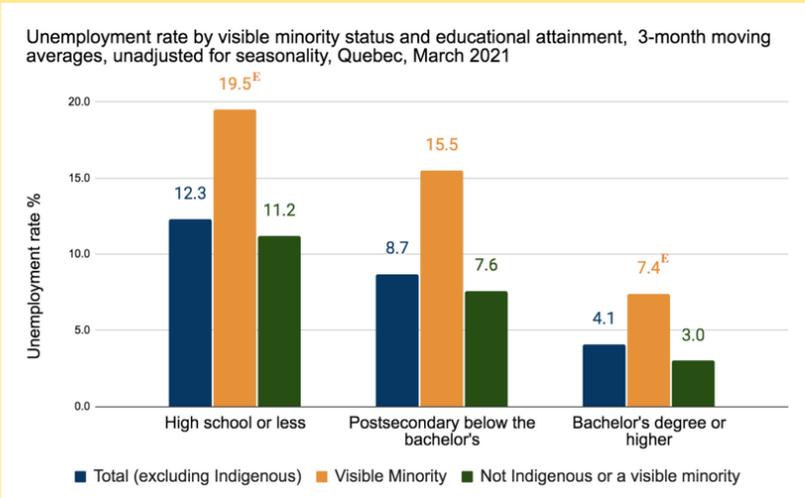

By John Davids, Xiaoyan Fang and Shania Bramble, Black In Quebec

Despite fluctuations, from Sept 2020 to Mar 2021, Visible Minority communities have maintained a significantly higher unemployment rate compared to the Non-visible minority (or Indigenous) community in Quebec.

## Quebec, unemployment rate, visible minority status

## Quebec, unemployment rate & education, March 2021

Notes: E: Use with caution; Coefficient of Variation greater than 16.5%

Individuals in the Visible Minority communities are around twice as likely (or more) to be unemployed than those in the Non-visible minority (or Indigenous) communities across all levels of education.

Visible Minorities in Quebec earn a lower median weekly income compared to the Non-visible minority (or Indigenous) community (March 2021) across different levels of education.
